Education

Bachelor of Pharmacy

October 2019 - July 2024

Olabisi Onabanjo University - Ogun state, Nigeria.

Projects and Works

Todo App

- Created a Todo application using React and its hooks. The application allows its users to add, delete and clear completed tasks.
- Functionality was also added to allow users rearrange items in the todo list and local storage was implemented to prevent list from clearing on browser refresh.

Mini E-commerce store

- Created a responsive E-commerce shoe store using React JS library
- Worked on a lightbox image functionality for the mini store to view and select through products on large screens.
- Created a fully functional cart in which items can be increased or decreased as well as deleted from cart.

Bank landing page

- Created a responsive fictional bank landing page using SASS and React JS
- Included stylish and simple animations to improve user interface and experience using Animate on scroll JavaScript library
- Successfully hosted the website on Netlify for external users to have easy access to the webpage.

Crowdfunding website

- Created a fully responsive crowdfunding website using HTML, CSS and JavaScript
- Included functionalities which allows users to add pledges of \$25 and above
- Included functionality which keeps track of the number of pledges made and also increases the current amount raised so far.
